Applications: Benefits & Features

- Corrosion and Weight:** Aluminum wheels provide added corrosion resistance when your application demands such and minimizes wheel weight (overall conveyor weight) when shipping considerations or light weight benefits are important.
- Targeted Applications:** Conveyor / skate wheels for straight or curved gravity flow conveyor applications, extendable conveyors, flow rails, lift gates. Used primarily in Shipping, Warehousing and Assembly.
- Performance:** FRANTZ conveyor wheels undergo rigorous testing to assure years of satisfactory use. The FRANTZ Sterling® Steel Ball Division manufactures balls for the auto and defense industries under a Quality Management System registered to IATF 16949:2016.

* Standard wheel engineered the same as Tortoise Shell® wheel except the thickness of the outer shell has been reduced. By maintaining the same design and components of our Tortoise Shell® wheel, the Standard wheel outperforms other low-cost wheels based on extensive testing by FRANTZ.
