

3876 / 3879

Unground / Commercial Bearing

Specifications

Bearing Type:	Flanged Unground Commercial
Load Capacity:	40 lbs.
Mounting Type:	Press Fit
Tube Size/Gauge:	1" x 16g
Max OD of Body:	0.965"
Bore Size & Type:	3876: 5/16" – Hex 3879: 5/16" – Round
Extension:	0.156"
Lubrication:	Oil (Grease is Special Order)
Temperature Range:	Oil, 0 to 400 F°
Balls:	Precision ground carbon steel, case hardened

Part Number for Ordering:
3876 - 3876000023
3879 - 3879000023

...Roll Easy with FRANTZ®

FRANTZ

Applications: Benefits & Features

Non-Precision Bearings: FRANTZ Non-Precision bearings offer the least rolling resistance, lower energy consumption and overall a greener option. Engineered to accommodate more axle deflection due to heavy loads or shock, especially when used in longer rollers (as compared to Precision or Semi-Precision bearings), often making non-precision bearings the product of choice in many conveyor designs.

Targeted Applications: Carton Rack and Gravity Conveyor applications at low to medium speeds requiring a small tube diameter used primarily in packaging, shipping, warehousing and assembly.
[Wheel Bearing Application](#) – It is common the 38XX series bearing is used in 'wheel bearing' applications and may be a replacement bearing for Schatz 'AF' series, Kilian 'F' series, KD 'BR' series or other manufacturers such as Freeway or General Bearing.

Long Life: FRANTZ non-precision bearings are engineered and tested to exceed the CEMA standard of one million revolutions.
